If you hear a sewer alarm or notice a flashing red light on a sewer control panel please contact the LMRSD immediately.

The annual meeting of the Lake Metigoshe Recreation Service District (LMRSD) is held for the benefit of all Lake Metigoshe property owners. This is your opportunity to be apprised as to how LMRSD operates and conducts business. We will review last year's projects and provide you with further plans for any new expansion.

The LMRSD Board of Directors consists of nine members. Each year three Directors are elected for a three year term. A membership committee (appointed by the Board) will present a slate of candidates for election to the vacant positions. **Any property owner within the boundaries of the LMRSD district, who would like to be a candidate for a board position, should contact one of the directors, or choose to be nominated from the floor during the annual election.** Voter ID required. Regular monthly meetings are held at 10 AM on the second Saturday of each month at the LMRSD office.

Before starting any landscaping or building improvements near or around a sewer (grinder) basin, please contact the LMRSD office at 263-4624 or 263-5624. **Sewer permits are required before beginning any work,** and can be obtained by calling the LMRSD office.

NOTICE

USE OF PUBLIC SEWERS AND GARBAGE COLLECTION SERVICES

Assessments for sewer and garbage services are based on the number of connections to the LMRSD sewer system. Each connection generates a separate assessment. It is the responsibility of the property owner(s) to notify the LMRSD if it is the intention of the owner(s) to remove one or more connections to the sewer system and thus terminate the assessment for each such connection. This is necessary so that charges for services are maintained current and accurate. When LMRSD is notified of an owner(s) intention to terminate services, LMRSD maintenance employees shall certify that the structure(s) have been removed and that any waste water collection facilities that were used in connection with said structure(s) have been properly capped to prevent future use.
